

INSTRUCTIONS FOR USE OF HISTORICAL REPLICA SOIL SURVEYS ON CD

Starting the CD

1. If the CD does not start automatically after inserting it into the D drive (or CD drive letter), double-click on the D drive and the following screen will appear:

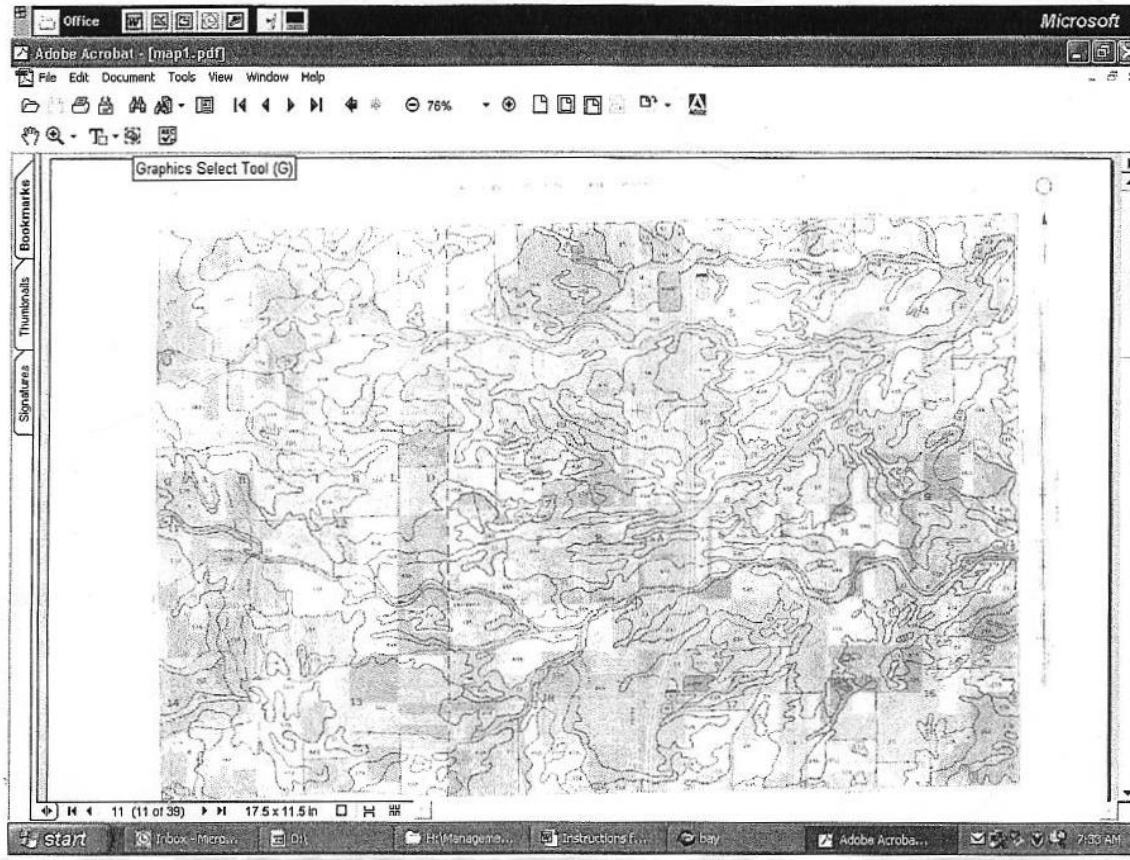

2. Double-click on the bottom icon above with the “.exe” extension.

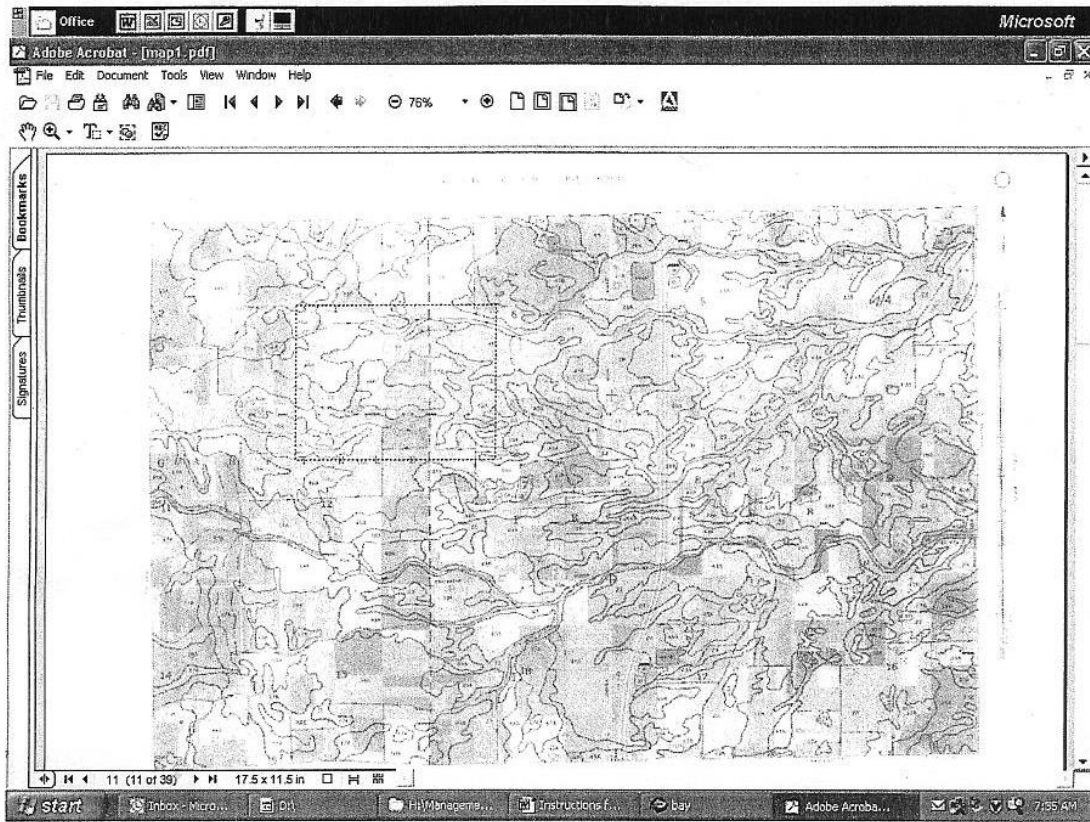

Printing Out Portions of Atlas Sheets

1. From the main menu in the bookmarks section click on “Index of Detailed Soil Maps.”
2. This will bring up the index to soil maps.
3. Click on the sheet you desire.

4. On the toolbar at the top of the screen, locate the “Graphics Select Tool” (will be the 4th icon over as shown below). Click on the button.

5. Now while on the atlas sheet move the cursor over to the area you wish to cut out.
6. Hold down the left button on the mouse and you will see that a white or dotted line will show up for the area you want to print out. See the figure below.

7. Now just go up to the main tool bar and click on “File” and then “Print.” Only the area you selected will be printed.
